

New England Biolabs Certificate of Analysis

Product Name: Monarch RNase A
 Catalog Number: T3018L
 Concentration: 20 mg/ml
 Packaging Lot Number: 10065144
 Expiration Date: 01/2022
 Storage Temperature: -20°C
 Specification Version: PS-T3018L v1.0

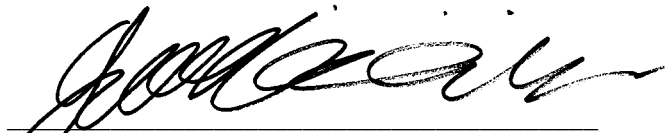

Monarch RNase A Component List			
NEB Part Number	Component Description	Lot Number	Individual QC Result
T3018-2	Monarch® RNase A	10065145	Pass

Assay Name/Specification	Lot # 10065144
Functional Testing (RNase A, Monarch®) A 10 µl reaction in NEBuffer 4 containing 40 ng of fluorescein labeled RNA transcript and RNase A is incubated at 37°C. After incubation for 5 minutes, complete disappearance of the RNA substrate occurs at ≤1.0 µg/ml of RNase A, as determined by gel electrophoresis using fluorescent detection.	Pass

This product has been tested and shown to be in compliance with all specifications.
